Consistent with these requirements, the layout and content of the Billof Quantities should be assimple and clear as possible.
- 3. The Bills of Quantities should be divided generally into the following sections:
  - a) Preambles

#### 5. NOTESONPREPARINGBILLSOFQUANTITIES

- 5.1 The <u>Preliminary Items</u> should be limited to tangible items that should be priced by the tenderer, are identifiable and can be priced separately and included in the interimvaluations precisely. Such items may include such items assite of fice, notice boards, and other temporary works, otherwise items such as security for the Works which are primarily part of the Contractor's obligations should be included in the Contractor's rates.

- AllitemsthathavenotbeenmeasuredandthereforenotsubjecttotenderspricingshouldbelistedintheBillsof Quantities as **Provisional Sums** for particular item or class of Work, which may be subject to a nominated subcontract or separate measurements at a later date during the execution of the works. For example, if it is deemednotpossibletomeasureelectricalworksbeforegoingtotenderbecausedetaildesignsarenot ready, a provisional sum can be allowed in the Bills of Quantities for "Installation of Electrical Works" to be executed laterwhenactualdesigndetailsarecompleted. To the extent not covered above, the reshould be in the Bills of Quantities ageneral provision for physical and financial contingencies made as a "Provisional Sumfor"

- Contingencies" and "Provisional Sum for Fluctuations". The inclusion of such provisional sums often facilitates budgetary approval by avoiding the need to request periodic supplementary approvals as the future need arises.
- 5.6 Provisional sums to cover specialized works normally carried out by Nominated Sub Contractors should be avoided and instead Bills of Quantities of the specialized Workshould be included as a section of the main Bills of Quantities to be priced by the Main Contractor. The Main Contractor should be required to indicate the name(s) of the specialized firms he proposes to engage to carry out the specialized Works as his approved domestic sub-contractors. Only provisional sums to cover specialized Works by statutory authorities should be included in the Bills of Quantities.

The Specifications should require that all materials, plant, and other suppliestobepermanentlyincorporated in the Worksbenew, unused, of the mostrecentor current models, and incorporating all recentimprovements in design and material sunless provided otherwise in the Contract. Where the Contractor is responsible for the design of any part of the permanent Works, the extent of his obligations must be stated.

Alternatives are appropriate in cases where obvious (and potentially less costly) alternatives are possible to the technical solutions indicated intender documents for certain elements of the Works, taking into consideration the comparative specialized advantage of potential tenderers.
- 6. The Procuring Entity should provide a description of these lected parts of the Works with appropriate reference to Drawings, Specifications, Bills of Quantities, and Design or Performance criteria, stating that the alternative solutions shall be at least structurally and functionally equivalent to the basic design parameters and Specifications.

Prices shall be adjusted for fluctuations in the cost of inputs only if **provided for in the SCC.** If so provided, the amounts certified in each payment certificate, before deducting for Advance Payment, shall be adjusted by applying the respective price adjustment factor to the payment amounts due in each currency. A separate formula of the type specified below applies:

**P** is the adjustment factor for the portion of the Contract Price payable.

**A** and **B** a recoefficients **specified in the SCC**, representing then on adjustable and adjustable portions, respectively, of the Contract Price payable and

I m is the index prevailing at the end of the month being invoiced and Ioc is the index prevailing 30 days before Bid opening for inputs payable.

**NOTE:** The sum of the two coefficients A and B should be 1 (one) in the formula for each currency. Normally, both coefficients shall be the same in the formulae for all currencies, since coefficient A, for the non adjustable portion of the payments, is a very approximate figure (usually 0.15) to take account of fixed cost elements or other nonadjustable components. The sum of the adjustments for each currency are added to the Contract Price.
