Date: 14th October 2026

ADDENDUM NO. 2

RE: TENDER NO. MITI/SDI/006/2026-2027 FOR SUPPLY, DELIVERY, INSTALLATION, COMMISSIONING, TESTING, TRAINING AND TWO-YEAR TECHNICAL SUPPORT FOR TRANS NZOIA COUNTY AGGREGATION INDUSTRIAL PARKS (CAIPS) SUNFLOWER OIL PROCESSING EQUIPMENT.

Pursuant to Section 75 of Public Procurement and Assets Disposal Act 2015 and ITT Clause 9 of the tender document. SDI issues addendum No. 2 following requests for clarification from prospective bidders.

QUERR NO. 1	RESPONSE
Post-harvest seed preparation process The technical specifications lack seed-preparation and extraction line after harvest. Please clarify	This process will not be carried out in this plant. The plant only receives seed with the correct moisture content. Post-harvest seed preparation process is not included in the tender document.
QUERRY NO. 2	
Seed drying Confirm whether a solar dryer or another seed drying system is required based on the expected moisture content of locally sourced sunflower seed.	The plant only receive seeds of the correct moisture content. No provision for drying in the plant. Drying not in the tender requirement.
QUERRY NO. 3	
Heavy-duty screw expeller rated at 500 kg/hour Confirm the expeller capacity and expected oil yield	Expeller capacity is 500kgs/hour. Expeller with the higher indicative oil recovery capacity as compared to approximate oil content in seed will be recommended.
QUERRY NO. 4	

Batch refining system rated at approximately 2 tonnes/day, plus polishing filtration Confirm that refining capacity matches the extraction rate and operating hours Confirm that refining capacity matches the extraction rate and operating hours	The refining capacity matches extraction rate 30% Recovery rate and above. Yes we confirm the refinery capacity matches the extraction. Please note that refinery is a batch process. The machine to have 100 percent duty cycle.
QUERY NO. 5	
Material Handling Confirm whether a motorized forklift, weighing scales and dedicated receiving/storage equipment are required	The plant is expected to process just what it can offload, so little space was provided for holding purposes. Motorized fork lift Not required. Provide two hydraulic trolleys of appropriate capacity (1-2ton), weighing scale, receiving pellets and any other equipment necessary for operationalization of the plant. Also provide necessary laboratory quality assurance equipment.
QUERY NO. 6	
Lack of electrical power requirements for the individual machines, processing chambers and auxiliary equipment. The tender specifications do not provide complete individual power-output or electrical-load requirements for all the processing machines and auxiliary equipment. The specification gives power ranges for some components, but several machines and utility systems have no stated motor rating in kW, voltage, phase, frequency, or starting-current requirements.	To avoid locking out bidders with different equipment power ratings, the specifications mainly focus on production capacity, process functions and final product quality as different manufacturers can achieve the same specified output with different motor ratings. We encourage providing proposal in-cooperating efficient energy consuming equipment. Class IE2 at a bare minimum, but for more energy saving gains, class IE3 or above. For a 500kg/hr screw-type expeller, 18–23 kW of electric motor power is required on average depending on the model and auxiliary heating and filtration systems availed. The bidder to evaluate the installed power rating at the various sites and ensure their equipment together with the auxiliary units matches the installations, this include

	the electrical accessories (LV boards, DBs, electric cables among others).
QUERRY NO. 7	
Back- up Generator We request the Ministry to confirm whether bidders are required to provide a complete standby power generation system	Not in the tender.
QUERRY NO. 8	
Itemized Bills of Quantities We request the Ministry to include applicable quantities and units of measurement for each item in the price schedule	The stated equipment matches the stated plant capacity of 500kgs/hr. This is covered in the tender document. This is complete component tenderer

Bidders are informed that this is addendum No. 2. Addendum No. 1 was previously issued and is available on the website www.industrialization.go.ke or government dedicated tender portal www.tenders.go.ke . The addenda forms part of the tender Document.

Completed tender documents are to be enclosed in plain sealed envelopes, marked the tender name and number, and addressed to:

Principal Secretary
State Department for Industry
Ministry of Investment, Trade and Industry
P.O Box 30547-00100,
Nairobi

and be deposited in the tender box situated at the **State Department for Industry offices**, on **Bishops Road, NSSF Building, Block A, Eastern Wing, 16th floor**, during normal working hours so as to be received on or before **Friday, 30th October 2026 at 11:00am**.

Tenders will be opened immediately thereafter in the presence of tenderers or their representatives who choose to attend, at the **Bishops Road, NSSF Building, Block A, 23rd Floor Boardroom**, on **Friday, 30th October 2026 at 11:00am**.

HEAD, SCMS
FOR: PRINCIPAL SECRETARY
