Kenya Power and Lighting Co. PLC

Network Management, Distribution, MV network, Live Line.

User Specification: Anti-Rust Lubricant

Description: Supply of multi-purpose anti-rust lubricant and penetrant, for maintenance and protection of equipment and metallic components.

Minimum Technical Specifications:

1. Shall be a multi-purpose penetrating lubricant, water displacer and corrosion inhibitor.
2. Shall effectively loosen rusted, seized or corroded metal components, nuts, bolts and fasteners.
3. Shall provide protection against rust and corrosion by displacing moisture and leaving a protective film.
4. Shall be suitable for use on metallic surfaces, electrical and mechanical equipment, tools and moving parts, as recommended by the manufacturer.
5. Shall assist in reducing friction and preventing sticking of moving mechanical components.
6. Shall be supplied in an easy-to-use aerosol spray can fitted with a nozzle for targeted application.
7. Aerosol can capacity: Minimum 400 ml.
8. Shall be supplied in original, sealed manufacturer packaging, clearly labelled with product name, manufacturer, batch number and safety information.
9. Shall be accompanied by the manufacturer's technical data sheet (TDS) and Safety Data Sheet (SDS).

Acceptable Product: Product meeting or exceeding the above specifications.

Note: Bidders shall indicate the offered brand, manufacturer and aerosol can capacity and submit supporting product technical documentation.
